

## Strengthening Insolvency Systems in Asia and the Pacific

**Date:** 15-16 December 2022

**Time:** 09:00-17:00 (GMT +8).

**Venue:** Auditorium Halls 1 & 2, Asian Development Bank Headquarters, 6 ADB Avenue, Mandaluyong City, Metro Manila, The Philippines.

**Organizers:** Asian Development Bank, Singapore Management University, Singapore Global Restructuring Initiative, University of Chicago Law School's Center on Law and Finance, University of Cambridge's Centre for Corporate and Commercial Law, INSOL International.

**Format:** Hybrid event.

**Audience:** The event will be open to regulators, judges, government officials and central banks from all over the world. An invitation-only policy will apply to the rest of participants.

**Background and objective:** A well-functioning insolvency system is essential for the competitiveness and growth of an economy. Yet, many countries in Asia and the Pacific still have inefficient insolvency frameworks. The lack of an attractive legal, market and institutional environment to deal with financial distress may hamper entrepreneurship, access to finance and economic growth. Additionally, a weak insolvency framework may increase the level of non-performing loans in the banking sector. If so, it can end up jeopardizing the stability of the financial system and even lead to sovereign debt issues. To address those problems while facilitating economic recovery in the post-pandemic world, this event will seek to analyze how countries in Asia and the Pacific can strengthen their insolvency and restructuring frameworks. To this end, the event will discuss modern trends and developments in corporate restructuring and insolvency and how an insolvency system should be designed or improved taking into account the legal, market and institutional features existing in a particular jurisdiction.

Topics to be discussed in the event will include: (i) strategies to effectively promote workouts; (ii) design of hybrid procedures and formal insolvency proceedings; (iii) adoption of simplified insolvency frameworks for micro and small enterprises; (iv) implementation of rescue financing provisions; (v) directors' duties and liability in the zone of insolvency; (vi) governance models of insolvency and restructuring proceedings; (vii) regulatory framework of insolvency practitioners; (viii) treatment of contracts in insolvency and restructuring proceedings; (ix) valuation of assets and ranking of claims in insolvency proceedings; (x) treatment of corporate groups in insolvency; (xi) personal insolvency; and (xii) cross-border insolvency. Additionally, all the panels will be encouraged to discuss market and institutional challenges and reforms that can make an insolvency regime more effective. While the event will provide lessons for the improvement of insolvency regimes in Asia Pacific, it will pay special attention to emerging economies in Asia and the Pacific currently considering the possibility of strengthening their insolvency frameworks. A list of background materials for the event is included as Annex 1.

**Accommodation:** Attendees will need to manage their accommodation in Manila. Hotels close to the conference venue include:

- Discovery Suites Manila: <https://www.discoverysuites.com/>
- Edsa Shangri La: <https://www.shangri-la.com/manila/edsashangrila/>
- Joynostalg Manila by Accorhotels: <https://www.joynostalgmanila.com/>

## Program

### **Day 1 (15 December 2022)**

08.30 – 09:00 Registration and coffee

09:00 – 09:15 Welcome

#### **09:15 – 10:05 Strategies to effectively promote workouts**

Chair: Nicholas Moller (Asian Development Bank)

Panelists:

- Antonia Menezes (World Bank)
- Scott Atkins (Norton Rose Fulbright & INSOL International)
- Stephanie Yeo (WongPartnership)
- Adam Badawi (Berkeley Law)

#### **10:05 – 10:50 Hybrid procedures and formal insolvency proceedings**

Chair: Aurelio Gurrea-Martinez (Singapore Management University)

Panelists:

- Mahesh Uttamchandani (World Bank) (Virtually)
- Yu-Wen Tan (Ministry of Law, Singapore)
- Anthony Casey (University of Chicago)
- Scott Atkins (Norton Rose Fulbright and INSOL International)

10:50 – 11:10 Coffee break

#### **11:10 – 12:10 Governance of insolvency and restructuring procedures: debtor in possession, insolvency practitioner or hybrid model?**

Chair: Adriana Robertson (University of Chicago)

Panelists:

- Jared Ellias (Harvard Law School)
- Aurelio Gurrea-Martinez (Singapore Management University)
- Paul Zumbro (Cravath, Swaine & Moore)
- Kotaro Fuji (Nishimura & Asahi)
- Wan Wai Yee (City University of Hong Kong) (Virtually)

#### **12:10 – 12:50 Regulatory framework of insolvency practitioners**

Chair: Scott Atkins (Norton Rose Fulbright and INSOL International)

Panelists:

- Ravi Mital (Insolvency and Bankruptcy Board of India) (Virtually)
- Catherine Roberson (University of Technology Sydney) (Virtually)

12:50 – 14:00 Lunch

#### **14:00 – 15:30 Valuation of assets and treatment of claims and contracts in insolvency proceedings**

Chair: Anthony Casey (University of Chicago)

Panelists:

- Deepak Rao (Insolvency and Bankruptcy Board of India)
- David Chew (DHC Capital)
- Wataru Tanaka (Tokyo University) (Virtually)
- Debanshu Mukherjee (Vidhi Centre for Legal Policy)
- Elizabeth McColm (Paul Weiss) (Virtually)

15:30 – 15:50 Coffee break

**15:50 – 16:50 Directors' duties and liability in the zone of insolvency**

Chair: Felix Steffek (University of Cambridge)

Panelists:

- Aurelio Gurrea-Martinez (Singapore Management University)
- Jason Harris (Sydney Law School)
- Paul Zumbro (Cravath, Swaine & Moore)
- Neeti Shikha (Virtually)
- Jared Ellias (Harvard Law School)

**16:50 – 17:40 Avoidance actions**

Chair: Jared Ellias (Harvard Law School)

Panelists:

- Brook E. Gotberg (Brigham Young University)
- Josh Macey (University of Chicago)
- Sumant Batra (Insolvency Law Academy)
- Charles Booth (University of Hawaii)

18:00 – 19:00 Reception

19:00 Dinner

## **Day 2 (16 December)**

08:00 – 8:30 Coffee

### **08:30 – 09:20 Insolvency frameworks for individuals and micro and small enterprises**

Chair: Nicholas Moller (Asian Development Bank)

Panelists:

- Andres Martinez (World Bank) (Virtually)
- Jason Harris (Sydney Law School)
- Scott Atkins (Norton Rose Fulbright and INSOL International)
- Charles Inso (University of Hawaii)

### **09:20 – 10:20 Rescue financing and administrative expenses**

Chair: Richard Squire (Fordham Law School)

Panelists:

- Justice Christopher Sontchi (Singapore International Commercial Court)
- Jared Ellias (Harvard Law School)
- Paul Zumbro (Cravath, Swaine & Moore)
- Emmanuel Chua (Baker McKenzie) (TBC)
- Aurelio Gurrea-Martinez (Singapore Management University)

10:20 – 10:35 Coffee break

### **10.35 – 11:25 Corporate Groups**

Chair: Felix Steffek (University of Cambridge)

Panelists:

- Raelene Pereira (Rajah & Tann)
- Edith Hotchkiss (Boston College) (Virtually)
- Richard Squire (Fordham Law School)
- Timothy Graulich (Davis Polk) (TBC)

### **11.25 – 12.30 Cross-border insolvency**

Chair: Justice Christopher Sontchi (Singapore International Commercial Court)

Panelists:

- Felix Steffek (University of Cambridge)
- Deeptanshu Singh (Insolvency and Bankruptcy Board of India)
- Josh Macey (University of Chicago)
- Andi Kadir (Baker McKenzie Indonesia) (TBC)

## **Annex 1: Background materials**

### **Panel 1. Strategies to effectively promote workouts**

An out-of-court restructuring (“workout”) provides several advantages, including flexibility, confidentiality, and saving the costs and stigma associated with insolvency proceedings. Therefore, promoting the use of workouts is generally considered a desirable practice, especially in countries without efficient insolvency frameworks. However, for a variety of reasons, including opportunistic behavior of debtors and creditors, regulatory barriers, and lack of a rescue culture, completing a workout is often challenging even for viable companies only facing financial trouble. For that reason, regulators or private actors may be required to adopt certain practices to effectively promote workouts. To that end, jurisdictions around the world have adopted several approaches, including: (i) the publication of good practices for workouts by association of banks or insolvency practitioners; (ii) the enactment of good practices and promotion of inter-creditor agreements facilitated by central banks; (iii) regulation of workouts in the insolvency legislation, even providing workouts with various tools existing in formal reorganization procedures. Likewise, as a means to further incentivise workouts, countries may adopt various changes in the regulatory framework for businesses, including changes in the tax legislation, amendments to the rules governing directors’ duties and liability in the zone of insolvency, and changes in the regulatory framework for financial institutions. This panel will discuss the most effective strategies to promote workouts, as well as the country-specific and firm-specific factors that may affect the design and effectiveness of these strategies.

## Panel 2. Hybrid procedures and formal insolvency proceedings

Countries around the world design insolvency proceedings very differently. For example, while certain jurisdictions have a single-entry insolvency process that may end up with a reorganization plan, a going concern sale or a piecemeal liquidation, other jurisdictions provide various insolvency proceedings – at least one of them primarily focused on reorganization and at least another one primarily focused on liquidation. Additionally, many jurisdictions provide hybrid procedures, such as a scheme of arrangement, preventive restructuring frameworks and pre-packs, that facilitate a debt restructuring – generally when a company is not formally insolvent yet. This panel will discuss the most desirable way to design an insolvency and restructuring framework, with particular emphasis on the type of procedures that should be ideally adopted taking into account the market and institutional environment existing in a country.

- UNCITRAL (2004), [Legislative Guide on Insolvency Law](#). New York.

## Panel 3. Governance of insolvency and restructuring proceedings: DIP, IPs or hybrid model?

The governance of insolvency and restructuring proceedings significantly differs across jurisdictions. Broadly understood, there are three primary models for the governance of insolvency and restructuring procedures: (i) the adoption of a debtor in possession model where the company's management would continue to run the firm without the appointment of an insolvency practitioner ("DIP model"); (ii) the appointment of a trustee/administrator/insolvency practitioner replacing the debtor's management team ("IP model"); and (iii) the appointment of a monitor overseeing the procedure and the debtor's management team ("hybrid model"). This panel will discuss the legal, market and institutional factors affecting the choice of the governance model of insolvency and restructuring proceedings.

**Relevant readings:**

- UNCITRAL (2004), [Legislative Guide on Insolvency Law](#). New York.
- Kenneth Ayotte, Edith S. Hotchkiss and Karin S. Thorburn (2014), [Governance in Financial Distress and Bankruptcy](#), in Mike Wright, Donald Siegel, Kevin Keasey and Igor Filatotchev (eds.), *The Oxford Handbook of Corporate Governance*, Oxford University Press, United Kingdom.

- Jared A. Elias, Ehud Kamar and Kobi Kastiel (2022), [The Rise of Bankruptcy Directors](#), 95 (5) *Southern California Law Review*.

This panel will discuss the optimal way to design a regulatory framework for insolvency practitioners. To that end, it will discuss the qualifications of insolvency practitioners and whether countries should adopt a licensing regime for insolvency practitioners and, if so, how. Moreover, it will discuss whether countries should adopt a regulatory agency to oversee insolvency practitioners. Finally, the panel will discuss the duties, liability and remuneration of insolvency practitioners.

- World Bank (2021), [\*Principles for Effective Insolvency and Creditor/Debtor Regimes\*](#). Washington, D.C.

An insolvency proceeding should maximize the returns to creditors by promoting the most efficient allocation of the debtor's assets. Therefore, valuation will play an essential role when determining the fate of a financially distressed firm. Additionally, creditors should be paid according to a set of contractual and statutory priorities. To that end, while some jurisdictions only respect (if so) the preferential treatment of secured creditors and most unsecured creditors are paid *pari passu*, other jurisdictions provide a preferential treatment to certain creditors such as tax authorities, employees, and tort claimants, and some legislations subordinate certain claims such as shareholder loans. This panel will discuss the most desirable way to determine the valuation and treatment of assets and claims in insolvency proceedings. It will also discuss the treatment of contracts in insolvency and restructuring proceedings, with particular emphasis on the contracts in which none of the parties have materially performed their contractual obligations ("executory contracts") and contractual provisions allowing a party to terminate the contract if the counterparty becomes insolvent ("*ipso facto* clauses").

## Panel 6. Directors' duties and liability in the zone of insolvency

When a company becomes factually insolvent but it is not yet subject to a formal insolvency proceeding, the shareholders –or the directors acting on their behalf– may engage in various forms of behavior that can divert or destroy value at the expense of the creditors. For this reason, many jurisdictions around the world impose special directors' duties and liability in the zone of insolvency. The way to regulate directors' duties and responsibilities in the zone of insolvency, however, significantly differs across jurisdictions. Namely, countries around the world have adopted different approaches including: (i) the imposition of a duty to initiate insolvency proceedings; (ii) the imposition of a duty to recapitalize or liquidate companies experiencing significant losses; (iii) the imposition of general duties towards the company's creditors, including a duty to minimize losses for the creditors; (iv) the imposition of a duty to prevent the company from incurring new debts; (v) the imposition of a duty to prevent the company from incurring new debts that cannot be paid in full; and (vi) the imposition of a duty to keep acting in the best interest of the corporation as a whole. This panel will explore the advantages and weaknesses of each regulatory model of directors' duties in the zone of insolvency, as well as a variety of country-specific and firm-specific factors that may affect the desirability of a particular approach. It will also discuss different mechanisms to deal with wrongful behavior in the zone of insolvency, including disqualification and liability of corporate insiders.

## Panel 7. Avoidance actions

Most insolvency jurisdictions include provisions that facilitate the avoidance of certain transactions entered into by a debtor prior to the commencement of an insolvency proceeding. These transactions seek to prevent or otherwise reverse transactions that can be detrimental for the creditors. Despite the benefits eventually created by these mechanisms, the use –and even existence– of avoidance actions is not costless. On the one hand, the initiation of these actions may generate litigation costs. On the other hand, the existence of avoidance provisions may harm predictability and legal certainty, especially in jurisdictions where it is relatively easy to avoid a transaction, usually because bad faith is not required, the lookback period for the avoidance of transactions is too long, or no financial conditions are required to avoid a transaction. This panel will discuss how countries should design avoidance provisions taking into account the conflicting policy goals often existing in the design of avoidance actions as well as the particular features of a country.

## Panel 8. Insolvency frameworks for individuals and micro and small enterprises

Micro and small enterprises (MSEs) represent the vast majority of businesses in most countries around the world. Despite the economic relevance of small businesses, most insolvency jurisdictions in Asia – and elsewhere – do not provide suitable insolvency frameworks for MSEs. This panel analyses how countries can adopt more attractive insolvency frameworks for small businesses. To that end, it will take into account the approaches that have been adopted by various jurisdictions, as well as the policy recommendations suggested by organisations such as the World Bank, UNCITRAL, and the International Insolvency Institute/Asian Business Law Institute. Moreover, it will discuss how these approaches and policy recommendations should be adjusted to different market and institutional environments. Lastly, this panel will discuss whether and, if so, under which conditions, countries should provide a discharge of debt for consumers and individual entrepreneurs.

## Panel 9. Rescue financing and administrative expenses

When a firm becomes insolvent, it may be unable to obtain new finance. As a result, the lack of finance may lead to the loss of suppliers, investment opportunities and going concern value. To address this problem, several jurisdictions around the world have adopted a system of rescue or debtor-in-possession (“DIP”) financing that seeks to encourage lenders to extend credit to viable but financially distressed firms. This is incentivized by providing DIP lenders with various forms of priority. This panel will discuss the most desirable way to facilitate post-petition financing to viable but insolvent firms. Moreover, it will do so taking into account the particular market and institutional environment existing in a country.

## Panel 10. Corporate groups

Many businesses are often organised through corporate group structures. Therefore, an insolvency system should respond to this economic reality. To that end, countries around the world have generally adopted three regulatory approaches to deal with corporate groups in insolvency. First, certain jurisdictions treat individual companies separately. Second, other jurisdictions have taken steps to facilitate the coordination of insolvency proceedings affecting corporate groups (“procedural coordination”). Finally, other jurisdictions allow, even if it is in exceptional cases, the consolidation of assets and liabilities of companies belonging to the same corporate group (“substantive consolidation”). More recently, as a variation of the approach facilitating procedural coordination, some countries have adopted some substantive rules that, without consolidating assets and liabilities, involve the use of certain insolvency provisions to the whole corporate group. Moreover, this latter approach often considers the “interest of the group” instead of the interest of the individual legal entities comprising the corporate group. This panel seeks to explore the most desirable way to deal with corporate groups in insolvency.

**Relevant readings:**

- UNCITRAL (2020), [\*Model Law on Enterprise Group Insolvency with Guide to Enactment\*](#).
- INSOL International (2022), [\*The Restructuring of Corporate Groups: A Global Analysis of Substantive, Procedural and Synthetic Group Procedures\*](#).

Many businesses nowadays have assets, creditors, offices, subsidiaries, clients or employees in different jurisdictions. The existence of an international component may add an additional layer of complexity to a situation of financial distress. To deal with a situation of insolvency with a cross-border element, commentators have generally suggested two different approaches: one of them that seeks to promote a single forum for the management of the insolvency proceeding (“universalism”) and another approach consisting of the opening of insolvency proceedings in those jurisdictions where the debtor has assets and creditors (“territorialism”). The disadvantages of both models led to some intermediate approaches. To that end, the most successful model has been the so-called “modified universalism”, which was the approach embraced by the UNCITRAL Model Law on Cross-Border Insolvency adopted in many jurisdictions around the world. This panel will discuss various approaches to deal with cross-border insolvency. These approaches will include modified versions of universalism and territorialism, as well as innovative contractual approaches suggested in the academic literature. It will also discuss new trends and developments in cross-border insolvency, including the use of insolvency protocols, the guidelines and modalities enacted by the Judicial Insolvency Network, and the UNCITRAL Model Law on Recognition and Enforcement of Insolvency-Related Judgments.
